About

At MD Environmental, we specialise in asbestos removal, soft strip, encapsulation, decontamination, and waste disposal.

Our services are tailored to meet the needs of businesses across the UK, including social housing providers, councils, industrial facilities, and commercial clients. From managing multi-million-pound contracts to smaller-scale projects, we deliver exceptional service and standards, ensuring safety and compliance every step of the way.

“With decades of experience and deep industry knowledge, our team has successfully handled projects of every size.”

Services

Asbestos Removal

We bring decades of experience handling asbestos removal projects of all sizes, from multi-million-pound contracts for industrial facilities and commercial properties to smaller-scale jobs in residential homes.

Our team has worked with councils, housing associations, blue-chip companies, and private homeowners, ensuring safe and efficient removal across a variety of settings. Whether it's a large industrial site, office building, or family home, we're equipped to manage every aspect of asbestos removal.

- Roofing Materials
- Pipe Insulation
- Wall Panels & Ceilings
- Floor Tiles & Adhesives
- Garage Roofs
- Industrial Plant Rooms
- Commercial Fit-Outs
- Demolition Prep
- Housing Estates.
- Heritage Properties

Asbestos Removal for Businesses and Homes Across the UK

Pre-Demolition Soft-Strip Services Across the UK

Encapsulation

We provide asbestos encapsulation, providing a safe and efficient alternative to removal. With decades of experience, our team expertly seals asbestos-containing materials to prevent fibre release and ensure ongoing safety. Whether it's an industrial site, commercial property, or residential home, we deliver tailored solutions that comply with strict regulations and minimise disruption.

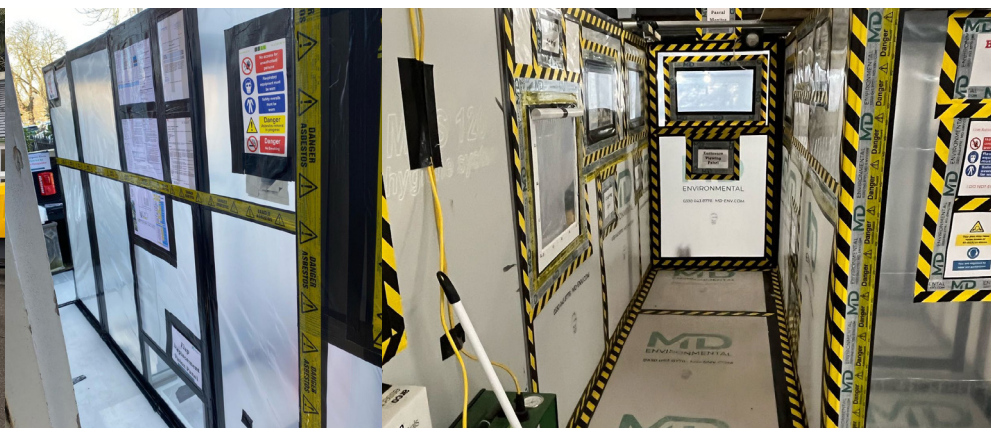

- Surface Sealing
- Pipe and Duct Encapsulation
- Structural Encapsulation
- Roofing Encapsulation
- Industrial Encapsulation
- Maintenance Support
- Compliance Documentation
- Emergency Encapsulation

Safe and Effective Asbestos Encapsulation Solutions

Soft Strip

Our experienced team specialises in soft-strip demolition works, providing safe and efficient removal of asbestos-containing materials and non-structural elements before full demolition or refurbishment begins. Our team has successfully managed both large-scale projects for industrial and commercial properties and smaller jobs in residential settings.

- Hazardous Material Removal
- Non-Structural Dismantling
- Waste Segregation
- Site Preparation
- Compliance Support
- Tailored Solutions
- Industrial and Commercial
- Residential Preparation

Asbestos Surveys

We provide asbestos surveys to help businesses and homeowners identify and manage asbestos-containing materials in their properties. Our team conducts thorough inspections to assess the presence, condition and risk of asbestos.

Whether you need a management survey, refurbishment survey, or demolition survey, we deliver clear, detailed reports to guide your next steps and ensure full compliance with regulations.

- Management Surveys
- Refurbishment Surveys
- Demolition Surveys
- Pre-Purchase Surveys
- Air Monitoring
- Sample Testing
- Compliance Reports
- Post-Survey Support

Asbestos Surveys

Decontamination

Choose MD Environmental for your decontamination services to ensure the safety and cleanliness of your property. With years of experience handling complex decontamination projects across industrial, commercial and residential settings, our team uses advanced techniques to remove asbestos fibres and residues from affected areas.

- Emergency
- Decontamination
- Contaminated Area
- Cleaning
- Negative Pressure Units
- HEPA Vacuuming
- Air Quality Testing
- Waste Removal
- Surface Sealing
- Decontamination Advice

Asbestos Decontamination Services

Waste Collection

ASBESTOS**

Social Housing

We work closely with councils and housing associations to ensure safe, compliant living environments for residents. Our team handles asbestos removal and related services in flats, high-rise blocks, housing estates, and communal areas.

Commercial Properties

Our services support a wide range of commercial properties, including office buildings, retail spaces, leisure facilities, and hospitality venues. From removing asbestos in ceiling voids to encapsulating materials in plant rooms or renovating older structures.

Industrial Properties

Industrial environments demand precision and expertise, and our team has extensive experience working in factories, warehouses, power stations, and industrial complexes. We can manage large-scale asbestos removal projects.

Industrial Properties

Our residential services focus on protecting families and their properties with safe and effective solutions. From asbestos removal in private homes to garage roof dismantling, outbuilding clearance and loft decontamination.

Meet the team

Ross

With 20 years industry experience, Ross is a true product of continuous professional development and provides the energy behind our team. His specialism is understanding a client's unique needs at every stage of the project, whether considering vulnerabilities within a social housing environment, the hustle and bustle around retail schemes or the planning around the complexity of a multi-million-pound industrial workstream.
